Job Title: Software Developer

Job Type: Full Time

Job Location: CA-Fremont

Posted On: 2019-02-10

Job Description:

Vertisystem, Inc. is seeking a qualified professional to fill the position of Software Developer based in Fremont, California. Responsibilities include: design, develop, create and modify computer applications software, using specialized utility programs to predict and measure outcome and consequences. Research, document, and implement program requirements and specifications. Analyze user needs and develop software requirements to determine feasibility of design within time and cost constraints. Write, translate, code and test software programs and applications according to specifications. Develop and execute unit tests for product components using continuous integration and test-driven development practices, and determine system performance standards. Manage software development, testing, project management and maintain the software automation frameworks. Collaborate with analysts and designers in the development and initiation of new software programs and applications. Consult with customers about software system design and maintenance. Utilize coursework in Probabilistic Methods/ECE, Modern Control System Synth, Digital Communications, Data Networks: Design & Performance, Digital Signal Process I, and Wireless Communications. Position requires 50% national travel.

Job Responsibilities:

--
