

**Job Id:** YATS10024

**Job Title:** DevOps Architect

**Job Type:** Full Time

**Job Location:** Las Vegas, NV

**Job Description:**

Our Client is hiring a Sr. DevOps Architect to partner with both technical and product teams to deliver a quality product. The Sr. DevOps Architect will influence and educate the best practices of building highly scalable applications to support their growing business.

About our Client: Our client is a world leader in Gaming Entertainment. They offer a robust benefits package including a yearly bonus and salary review. Being a world leader, they also offer Global career opportunities. You will be leveraging your technical leadership to design, implement, and support core organizational functions, leading DevOps development teams in US, India, and Australia.

**Required Skills:**

- 5+ years of experience or expert level with design of C# and .NET technologies
- 5+ years of production experience or expert level with tools: Docker, Kubernetes
- 5+ years of experience or expert level with tools: Ansible (preferred) or Puppet or Chef
- 5+ years of experience or expert level with cloud-based architecture (ideally Microsoft Azure, GCP or AWS)
- 3+ years of experience with design of Micro Service Architectures
- 5+ years of experience or expert level with SOA, security, and/or data architecture practices (at least 1 is 'Required', having all 3 would be 'Preferred')
- 8+ years of experience or expert level delivering DevOps functionality both on premise and Cloud
- 5+ years of experience or expert level working in a technical architect capacity (leader), most recent role included
- 5+ years (or expert level) creating effective frameworks and process models to establish enterprise-wide technical architecture and architecting high volume, scalable transactional systems

**Desired Skills:**

- 2+ years' experience with Casino Management Systems and Casino Operations.
- 5+ years of experience or expert level with design of C++ or Java technologies
